DETAILED ACTION

Status of Claims

1. This action is responsive to amendment filed on 7/27/09, where Applicant amended claims 1,18-21,25-27. Claims 1-4,7-12,18-21,25-27 remain pending.

Response to Arguments

2. Previous objections and 112 2nd paragraph rejection are withdrawn.
3. Previous 101 rejection is withdrawn.
4. Applicant's arguments, filed 7/27/09, with respect to the rejection(s) of claim(s) 1-4,7-12,18-21,25-27 have been fully considered but are not persuasive.
5. Applicant argues that Bolik fails to teach the limitation of "combining messages from at least two separate sessions for the destination ...".

In reply, Bolik does indeed teach this limitation. Referencing Figure 2 of Bolik, Bolik teaches that multiple clients (i.e. 4a, 4b) can submit multiple ADD requests for backup objects (at least column 5 lines 65-67). Furthermore, multiple objects can be embedded within a single ADD request (at least column 6 lines 38-40). The submitted backup objects originate from two different data sources, which are the clients 4a and 4b. Each client is effectively engaged in a backup session with the server 2. The backup objects, from the different data sources, are combined at the server to be transmitted to the storage destination 8. Applicants claim language is broad. The claims are given their broadest reasonable interpretation and it is thus seen that the claims are unpatentable over Bolik.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. **Claims 1, 7, 10, 12, 18 & 27 rejected under 35 U.S.C. 103(a) as being unpatentable over Bolik et al (US Patent No 6857053).**
8. **Claims 2-4, 11, 19-21 & 26 rejected under 35 U.S.C. 103(a) as being unpatentable over Bolik et al (US Patent No 7,305,486) in view of Gilman et al (US Patent Publication No 2003/0079121).**
9. **Claims 8, 9, 25 rejected under 35 U.S.C. 103(a) as being unpatentable over Bolik et al (US Patent No 7,305,486) in view of Lucovsky et al (US Patent No 6223207).**
10. For a detailed listing of these rejections, see the Office Action dated 4/27/2009.

Conclusion

11. Applicant may not introduce any new matter to the claims or to the specification. For any subsequent response that contains new/amended claims, Applicant is required to cite its corresponding support in the specification. (See MPEP chapter 2163.03 section (I.) and chapter 2163.04 section (I.) and chapter 2163.06)

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
